Lab 1 — Semantic HTML Scaffold

Before you design your own CV in Assignment 1, practice the raw skeleton: build a semantic HTML5 skeleton (no styling required) for a generic e-commerce homepage — correct <header>, <nav> with at least 4 links, a <main> containing three <section>s (featured products, categories, newsletter signup), and a <footer> with at least three columns of links. Validate your HTML with the [W3C Validator](#) and include a screenshot of a clean validation result in your completion PDF.

<html lang="en">

    <meta charset="UTF-8" >

    <title>LAB1</title>
  </head>
  <body>
    <header><h1>Welcome to our website</h1></header>
    <hr>

    <nav>
      <ul>
        <li><a href="">Home</a></li>
        <li><a href="">About</a></li>
        <li><a href="">Services</a></li>
        <li><a href="">Contact</a></li>
      </ul>
